## Bing My Business

I'd love to know anyone else's thoughts For me the major game-changer is if you manually enter your Bing Places for Business, you can skip the extra work by simply importing the business data from Google My Business, and best of all you don't have to waste time verifying the client's business if it is already verified in Google My Business! That means no hassle of phone calls or postcards from Bing!It looks like to me that Bing is taking the steps in the right direction, by making our jobs just a bit easier..
